## RELEVANT EXPERIENCE

### **Accenture** | Software Engineer, Nov 2019 - Present

Built an ethereum-based blockchain application on AWS to trade securities for a large financial corporation. Wrote code and full unit tests coverage in Node and Java microservices. Project used tools such as AWS Lambda, QLDB, API Gateway and OpenAPI specification. Led a team of new analysts on an internal project to create a trello-like collaboration tool in React and AWS Amplify. Provided mentoring sessions to help new team members level up and grow.

### **Big Nerd Ranch** | Software Developer, Oct 2017 - Oct 2019

As a consultant, I built both Web and Android apps for clients, focused on modern Front-End JavaScript and Android development with Kotlin. I taught week-long *Front-End Essentials with React* courses for clients to level up their teams in modern JavaScript web development. On the Android team, I worked on hardware IOT devices running the Android OS as well as mobile devices, focused on UI and layout work for efficient data loading and rendering.

### **Intential** | Software Engineer, May 2017 - Oct 2017

Developed and tested a MERN-stack (MongoDB, Express, React, Node) network automation application within the Software Defined Network industry for Internet and Telecommunications Service Providers. On the Projects team, I coded custom feature requests, wrote unit tests to ensure code strength, and worked with clients to teach our technology.

### **Georgia Tech Coding Bootcamp** | Teaching Assistant, Apr 2017 - June 2018

Worked closely with students to guide their learning experience, troubleshoot their code, and tackle technical bugs or gaps in comprehension. Held office hours to assist students one-on-one and answer questions candidly about starting a software career from a bootcamp grad perspective. Six-month full-stack JavaScript program.

### **Ecological Biodiversity Lab** | Lab Assistant, Sept 2013 - June 2014

Performed highly analytical lab procedures in an NSF-funded Sustainable Biofuels Experiment to promote algae biodiversity to produce sustainable biofuels in efforts to bring alternative energy sources to viability at scale.

## EDUCATION

### **DigitalCrafts** | Atlanta, GA — Full Stack Web Development Immersive

2017 - Top-rated 4-month immersive modern web development program

### **University of Michigan** | Ann Arbor, MI — B.S.

2010 - 2014 - Earth and Environmental Sciences

## SKILLS

### **Front End Web:**

React.js, Redux  
JavaScript (ES6+)  
HTML, CSS  
jQuery  
Vue.js

### **Back End Web:**

Node.js  
Express.js  
Java  
MySQL  
MongoDB  
AWS Cloud

### **Android Development:**

Java & Kotlin  
Android Studio Code  
XML

### **Dev Tools:**

Git & GitHub  
Swagger/OpenAPI spec  
E2E Testing in Cypress  
Chrome Dev Tools  
Agile Development
